International & Cross-Border Advisory

A structured analysis of the specific business model - not a generic country tax guide.

THE PROBLEM WE SOLVE

International activity creates tax, VAT, invoicing, entity, payroll and operating questions that cannot be answered reliably without understanding the transaction flows and business model.

When it is relevant

- A foreign company or founder is entering Greece.
- A Greek business is expanding abroad.
- You have cross-border services, e-commerce or group transactions.
- You need a practical tax and compliance implementation map.

What we do

- Map countries, entities, customers, suppliers and payment flows.
- Assess Greek tax, VAT, invoicing and permanent-establishment considerations.
- Review intercompany flows, payroll considerations and transfer-pricing readiness.
- Coordinate with local advisers where foreign-law input is required.

What you receive

- Facts & Assumptions and Transaction Flow.
- Tax & VAT Map and entity / PE risk map.
- Compliance calendar and action plan.
- Local-adviser coordination matrix where required.

Not automatically included

- Foreign-law legal opinion.
- Foreign tax compliance unless specifically arranged.
- Full transfer-pricing documentation unless separately scoped.
- Representation before foreign tax authorities.

HOW THE ENGAGEMENT STARTS

01	02	03
Cross-border diagnostic	Market-entry / tax memo	Implementation & recurring support

Specialist project

From €900 + VAT

Clarity. Strategy. Growth.
